**Easily replace your old bathtub
drain using the ezXtractor.**

**Finally, you can remove or change the
drain trim in a tub without damaging
the tub or yourself!**

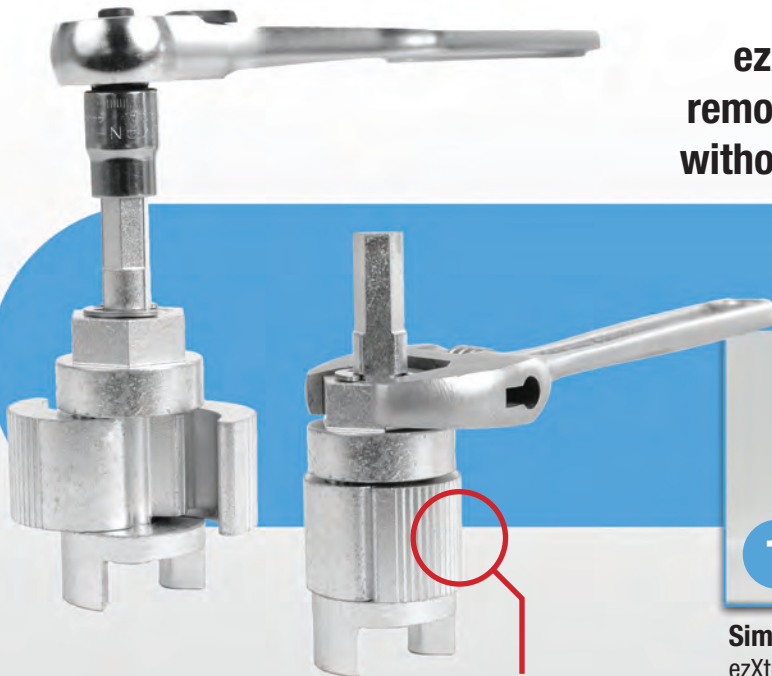

MPP Ridgway, Ridgway, PA 15853

Made in America

**ezXtractor safely and easily
removes the trim or shoe in a tub
without damage to you or the tub!**

Easy as 1, 2, 3!

*Factory serrated edges grip the
sides of the drain shoe.*

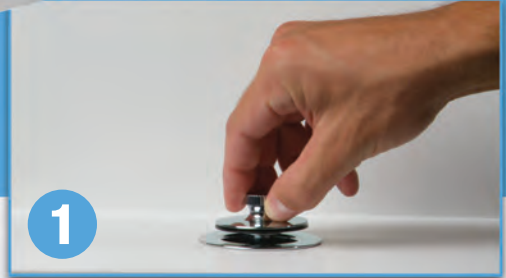

Simple: ezXtractor is easy to use. Fit it into the shoe and turn! The ezXtractor works even when the drain cross hairs are broken or missing.

Safe: No more sawzalls, hacksaws, or other dangerous removal methods.

Cost-Effective: Two tools in one. Precision factory manufactured, serrated edges grip the sides of the drain shoe while two bottom oversized prongs grip the bottom cross (if still there). Now easily turn out the old shoe. Also use ezXtractor to remove or fit pipes and pipe nipples 1 3/8" to 1 3/4".

Made in the USA to high quality ISO standards using high strength nickel steel. Ask for ezXtractor where you buy your professional plumbing products.

**Every tool box should have one.
Every contractor should own one.**

Simple: Remove stopper and position ezXtractor in the shoe or trim to be replaced.

Flexible: Use a socket wrench or standard crescent wrench: ezXtractor will not slip and bust your knuckles. ezXtractor also fits pipe nipples 1 3/8" – 1 3/4".

Safe: Shoe or trim comes out safely without damaging the tub or yourself.
